

Seating

Ergonomic Office Chair

High Back

Spinely

Our spine is one of the most important part of our body that gives us structure and support. It plays a vital role to enable us to perform simple tasks like standing up and sitting upright. Spinely's inspiration comes from the structure of the human vertebrae. The idea is to create a chair that simulates the support of the spine. Spinely is available in two colours, black for a polished and sleek look, white for a fun and edgy office setting.

Standard Features
