BUILD

FLOORING IN PROGRESS

A modern living room with two dark grey sofas facing each other, a low wooden coffee table in the center, and a large abstract painting on the wall. The floor is made of light-colored wood planks.

DRIVING FACT-BASED DECISIONS

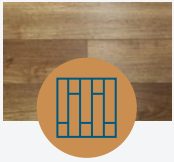

How we deliver satisfaction

At Antarc, we believe that clients deserve the most professional expertise based on facts to make decisions that will satisfy them for a long time.

We assist our clients in selecting flooring solutions tailored to their purpose of use, functionality, trends, taste, and budget. And this sets us apart from other flooring providers in East Africa.

The finest selection of flooring in East Africa

We only bring you the best

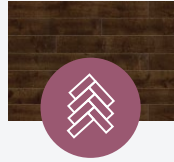

LAMINATE

Laminate flooring is constructed from a High density fiber board (HDF) core with a realistic wood like finish and a protective wear layer on top.

VINYL

Vinyl flooring is a waterproof option constructed from SPC (Stone Plastic Composite) with a realistic wood like finish and a protective wear

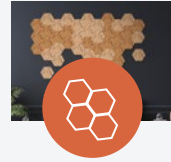

ENGINEERED WOOD

Engineered wood flooring is made from real wood which has a 3 layer construction featuring a top layer made of Oak/Walnut/Ash.

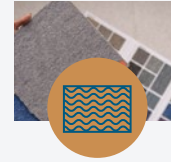

SPECIALITY

Special flooring solutions ideal for industries, manufacturers, medical facilities, hospitality, workspaces and educational institutions.

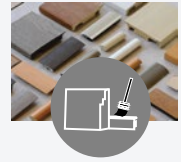

CORK

Cork is 100% natural . It helps warm and enrich interiors while providing unique acoustic properties that control noise and absorb sound.

CARPET

High quality carpet with innovative designs and an extensive offering of multi-functional use.

Modern Design

Rich, authentic and versatile

Modern, subtle patterns and a palette of contemporary colors that harmonize easily. Modern layout with a versatile collection to inspire and coordinate all the elements in a space, from floors to walls and even furniture.

Modern Sustainability

Made from natural materials, Linoleum collection provides sustainable, durable flooring for commercial applications. Cradle to Cradle Certified™ Gold.

Modern Performance

Blending the best of tradition with modern performance

Versatile, functional and high-performance flooring solutions to meet a wide variety of needs: acoustic, conductive, static dissipative, wall covering and even loose-lay solutions.

Linoleum is a versatile flooring solution made from 100% natural raw materials. It offers a range of traditional marble to subtle modern patterns, with a palette of natural tones and contemporary colors. Linoleum is sustainable and environmentally friendly, with 100% of our raw materials positively assessed according to the Cradle to Cradle® eco-design framework. It is treated with our unique xf² surface protection.
