SPECIALTY

ACCESSORIES

The finest selection of vinyl flooring in East Africa

what is rigid vinyl flooring?

WEAR LAYER WITH PU COATING

A transparent film with a polyurethane coating to protect flooring from extensive foot traffic.

DECORATIVE FILM

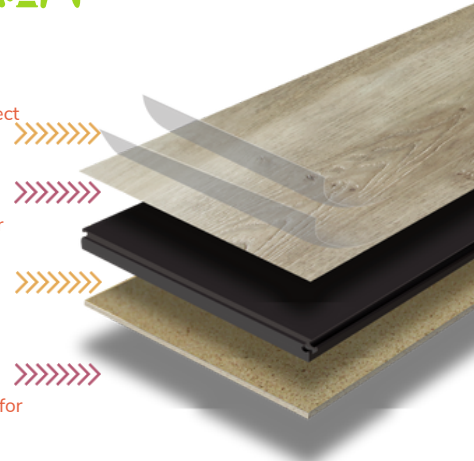

A high-resolution image that imitates wood, ceramic tile or stone.

COMPOSITE CORE

100% water-resistant composite core, free from plasticizers and ortho-phthalates.

FOAM UNDERLAY

Pre-attached foam underlay for soft and quiet underfoot and improved sound absorption.

pros & cons of each vinyl option

CUSHION VINYL

- entry level and cheap option
- soft and quiet to walk on
- easy to install (loose-lay)
- not very durable in comparison with other vinyl flooring options, any sub-floor unevenness will telegraph to the surface

GLUE DOWN VINYL

- relatively cheap option
- soft and quiet to walk on
- more expensive to install due to sub-floor preparation and adhesive
- very durable and perfect for areas with very heavy traffic

CLICK RIGID VINYL

- most expensive but still affordable
- soft and quiet to walk on
- easy to install (click system)
- very sturdy construction that can withstand minor subfloor imperfections
